

Catalogue of Owls in the National Museum of Ireland (Aves: Strigiformes)

J. Sigwart^{1,2}, E. Callaghan², A. Colla^{1,2}, G. Dyke², S. L. McCaffrey^{1,2}, N. Monaghan¹

1. National Museum of Ireland, Natural History Division, Merrion Street, Dublin 2, Ireland

2. University College Dublin, Department of Zoology, Belfield, Dublin 4, Ireland

August 2004

The list below represents the holdings of Owls, both scientific study skins, specimens mounted for display by taxidermy, and skeletons in the National Museum of Ireland, Natural History Division, Dublin, Ireland (NMINH). This catalogue does not include eggs or fluid-preserved material. The fields are as follows:

NMINH catalogue number: catalogue number

Family, Genus, species, and Common Name: nomenclature used is as according to the references listed. No attempt has been made to provide any indication of synonymy in this catalogue. Names listed reflect the names with which specimens are currently labelled in NMINH collections. In some cases, if nomenclature is subsequently been updated after cataloguing, or for materials that are part of our permanent exhibit collection, a note is made of the label nomenclature (see **Notes**).

Gender: M = male, F = female juv = juvenile specimens; this information is given where indicated on specimen label or can be determined from plumage

Locality: locality data as indicated on original specimen label

Collection Year: only the year of specimen capture is given., although more specific data (day and month) are often listed on the original labels

Collector: the individual responsible for original capture of the specimen, if indicated

Donor: as listed on specimen labels. Additional information may be available for some specimens, from NMINH archives.

Notes: includes points of interest for each specimen, including conservation status for vulnerable, endangered, and extinct species, as well as indications of specimens as nests, skeletons, or as taxidermy mount preparations ("mount"). In some cases, note is made of outdated nomenclature which appear on the specimen labels in the collection.

The collection contains 74 specimens, including 19 genera.

The list is arranged systematically by family, and alphabetically by genus and species, as follows.

TYTONIDAE (Barn-owls): *Phodilus*, *Speotyto*, *Tyto*

STRIGIDAE (Typical Owls): *Aegolius*, *Asio*, *Athene*, *Bubo*, *Carine*, *Glaucidium*, *Ketupa*, *Ninox*, *Nyctala*, *Nyctea*, *Otus*, *Ptilopsis*, *Pusatrix*, *Scops*, *Strix*, *Surnia*
