

# Professional Certificate In Child Protection

## COURSE FEATURES

Only University Accredited Course of its kind in Ireland.

Child Protection issues are becoming increasingly prevalent to all professionals who work with paediatric patients. It is with this focus that "Child Protection in a clinical environment" has been developed. This course gives a broader understanding of the professional and legal considerations any staff member may find themselves involved with as a member of the multi-disciplinary, multi-agency team.

The module has been designed with a blended learning approach: two on-site taught days and a flexible release online learning approach in order to facilitate a reasoned work / life balance for applicants.

## WHO SHOULD TAKE THIS COURSE?

This professional certificate is open to all health care and associated professionals dealing with paediatric patients. It is specifically targeting those who are interested in widening their inter-disciplinary and legislative knowledge in the arena of Child protection.

Applicants should normally possess at least one year post-qualification experience.

## COURSE DETAILS

Major code	X676
Duration	1 Semester
Schedule	Part-Time
Next intake	January annually

## leg-is-la-tion

### COURSE DESCRIPTION

#### SKILLS AND KNOWLEDGE

This 10 credit professional certificate aims to develop skills and knowledge to lead multi-disciplinary staff to better understand their varied roles and responsibilities relative to all aspects of Child Protection. This course has been designed to provide theoretical background with a significant emphasis on clinical experience and relevance.

#### EXPERIENCE

Participants will continue to gain their experience in their own professional environments.

#### TEACHING & LEARNING

Throughout this professional certificate participants will profit from a blended learning approach integrating formal lecture attendance alongside discussion, tutorials and e-Learning as well as self-directed learning. The teaching and learning strategies are designed to encourage autonomous reflective practitioners who can further develop their personal and professional skills within a supportive framework.

### ABOUT UCD DIAGNOSTIC IMAGING

UCD is an internationally recognised centre of excellence for Diagnostic Imaging. The School of Medicine & Medical Science offers an extensive portfolio of graduate taught courses, which cater to a diverse range of healthcare professionals.
