Prof. Helmar Schubert, Tech. Univ. Karlsruhe (Germany)
Prof. Li Shujun, CAAMS, Beijing (China)
Prof. R. Paul Singh, Univ. of California, Davis (USA)
Prof. Żózef Targonski, Rector of Agric. Univ. Lublin (Poland)
Prof. Wojciech Weiner, Tech. Agric. Univ. Bydgoszcz (Poland)
Dr. Arzhang Javadi, Agric. Eng. Res. Inst. IAEIR (Iran)
Dr. Zhongli Pan, USDA (USA)
Dr. Manuela Zude, Inst. of Agric. Eng. Potsdam-Bornim (Germany)

Topics of the Conference
The topics to be covered include:
- Physical properties of food materials
- Unit operation
- Mechanical properties and structure
- Thermal properties and processing
- Dehydration process
- Extrusion and expanding technology
- Emerging technologies
- Minimum processed food
- Small technologies
- Sustainability in food production
- Gastronomy, catering & food chain technology
- Sensors, process control and automation
- Standardization of food products
- GMP, HACCP and food safety
- Tracking & traceability
- Education in food engineering

Time and Venue
April 26th – 28th 2006
Hotel “GROMADA”
Pl. Powstańców Warszawy 2
02-148 Warsaw, Poland
E-mail: marketing.domchlopa@gromada.pl

Conference Language
English

Call for Papers
You are invited to submit a paper to the Symposium on FUTURE OF FOOD ENGINEERING. Please note the following dates:
- Deadline for abstracts submission (on internet): October 15, 2005
- Notification of abstract acceptance: October 30, 2005
- Deadline for full paper submission: December 30, 2005
- Technical program available on the website: January 15, 2006

For further information and registration, please contact the Symposium website at http://www.cigr.pl

For scientific and programme information please contact: Prof. J. Grochowicz
E-mail: growicz@faunus.ar.lublin.pl
Travel Documents

Passport A valid passport (or other ID Card) is required for all people entering Poland. Passport must be valid for longer than the period of stay in Poland.

Visa Visitors of some nationalities must obtain a visa prior to arrival. Visa application form and further information can be obtained from Polish embassies and consulates. As visas may take some time to process (in case more than one month), please make sure to apply early.

Conference Fee
- up to 15 October 2005 — 290 EUR
- after 15 October 2005 — 350 EUR

Pre-Registration Form

City: ............................................................................
State: ............................................................................
Postal Code: ...................................................................
Country: ........................................................................
Phone: ..........................................................................
Fax: ..........................................................................
E-mail Address: ............................................................... 

Abstract Title: ........................................................................ 
....................................................................................

Background
CIGR Section VI deals with the food engineering principles in minimally processed food achieved under process control. It is intended to follow the trends and promote sustainability in food production. Its missions are:
- to bring together all those who are working in food processing,
- to stimulate research and education in food engineering,
- to enhance participation in CIGR activities,
- to determine the areas that should be investigated and implemented into food production by using friendly, non-destructive technology, and
- to advance in knowledge for the assurance of safety of all food products for human consumption.

In order to better fulfill its missions, following the successful 1st international conference on bioproducts processing and food safety held in October 2004 in Beijing, CIGR Section VI is organizing the 2nd Technical Symposium on future of food engineering in Warsaw, Poland from April, 26th – 28th 2006. This symposium will take a series of presentation and discussion in plenary, scientific and poster sessions, and informal gatherings to highlight most recent developments in food processing, small technologies as well as sustainability in food production. The full proceedings of the Symposium will be published in CD-ROM and provided to all participants at the registration desk during the Symposium. Selected papers presented at this conference will be published in a special issue of Journal of Food Engineering, and recommended for publication in CIGR e-journal.
