Master of Public Health, Master of Public Health (Nutrition) and Master of Public Health (Internation

#### GRADUATE

# Course Aims

The Master of Public Health provides broad-based education and training in the basic disciplines which underlie the practice of Public Health. The course provides the academic foundation for the practice of Public Health. The perspectives and skills acquired will be of importance both to employers and employees. These skills are now becoming increasingly important as we face the challenges of providing appropriate and equitable Health Services for the 21st Century.

Following successful completion of the course, the student will have acquired the following:

- Knowledge of the factors influencing health status
- Epidemiological skills of study design and analysis
- An understanding of the Public Health function
- The skills to work as an active team member in planning, implementing, monitoring and evaluating health policy
- Skills to assess the health status of populations
- Critical appraisal and effective problem-solving attributes
- An understanding of the organisation and financing of Health Services and their impact on population health
- The capacity to integrate knowledge from a range of disciplines effectively

## Length of Programme

The full-time course for the Master of Public Health extends over one academic year of study. Alternatively a part time course is offered extending over two academic years. Full-time attendance is required.

# Mapping your Masters

The course is divided into four blocks, each of which may contain core and elective modules. Module details are available at: http://www.ucd.ie/phpps/postgraduateprogrammes/mph Please note that running elective modules is subject to demand, and requires a minimum number of students per module.

#### Examinations

Examinations and Assignments for the Degree of Master of Public Health are held during the course and/or at the end of each semester.

#### Dissertation

Each candidate must present a dissertation on a subject allocated by the School of Public Health, Physiotherapy and Population Science, which shall embody a detailed literature review, empirical analysis and a fully elaborated research proposal outline. The dissertation must conform to the School requirements.

### MPH (Nutrition)

This specialised MPH programme will provide the skills to work in nutrition-related health promotion, in the health service, industry, government departments, education and research in public health nutrition. Applicants should hold a primary degree in a nutrition related subject. Studens will take all the MPH core modules with additional relevant modules and complete their dissertation on a nutrition related topic. Applicants to this programme should apply to the general MPH programme. Further information is available on the website.

#### MPH (International)

Increasingly public health problems are global requiring global solutions and with the freer movement of people and human & animal foodstuffs infectious diseases, and contaminated product, can rapidly become widely disseminated. The health of a country's citizens is often dependent on the controls and public health infrastructure in operation in another. International surveillance and early warning systems were never more important but the thresholds for accessing the health service and the efficacy of public health systems varies greatly. Mortality and morbidity are not evenly distributed across societies and poorer people suffer poorer health. Infectious diseases, chronic diseases, obesity and protein energy malnutrion all have an international dimension The disparity in the economic situation between countries, and between subpopulations within countries, grows ever wider as does the associated health status. Many graduates from the MPH work in the international arena and this stream of the MPH, where the two international health modules are compulsory and the thesis has to be on an international health topic, should position them better for employment in this sphere. Further information is available on the website.

Admission Requirements
