

UCD School of Medicine
Excellence in Teaching & Research

Excellence reveals itself under the microscope

Peter A. Dervan was appointed Consultant Pathologist to the Mater (and initially Richmond) Hospitals, Dublin in 1978 and Professor of Pathology at University College Dublin and the Mater Hospital in 1991. During his tenure, until his retirement in 2008, he excelled as a histopathologist; leading to innovative research in areas like breast and bone cancer positively affecting the lives of 1000's of cancer patients both in Ireland and abroad. This award recognises Prof. Dervan as a leading medical researcher and outstanding, innovative teacher.

The Peter Dervan Memorial Medal for excellence in cancer pathology is awarded following a competitive viva voce to the student who demonstrates excellence in cancer pathology by achieving the highest combined GPA score in core medicine modules with a significant cancer pathology content.
