

Post-doctoral Research Assistant, University College Cork

Applications are invited for a post-doctoral research assistant in University College Cork in an interdisciplinary team focussing on a research project in collaboration with an international biomedical device company in the region. The project is in a novel area of research focussing on the convergence of medical devices with active pharmaceutical ingredients. The contract is for 1 year.

The successful candidate will have a PhD in Chemistry, Pharmaceutics or a relevant discipline. Experience in the pharma/medical device industry would be an advantage.

To Apply:

Suitably qualified applicants should submit a full CV, contact details for 2 referees and a 1 page summary of your research expertise & experience to:
