

# School of Geography, Planning and Environmental Policy

## Lecturer in Environmental Policy

(5 year or permanent post, with the possibility of permanency depending on the circumstances of the successful candidate)

Salary: €50,807 - €81,452 p.a. (Approx. GB£45,300 - £72,620; US\$68,600 - \$110,000 p.a.)

Applications are invited for the position of Lecturer in Environmental Policy in the School of Geography, Planning & Environmental Policy (GPEP). The School is a leading centre for geography, planning, environmental and related public-policy research and offers a range of innovative undergraduate and graduate programs. Applications are sought from outstanding scholars with substantive research interests in Environmental Policy that would enhance the School's research profile.

University College Dublin (UCD) is a large and diverse University whose origin dates back to 1854. There are over 22,000 students including 2,500 international students from more than 80 countries. The University is situated on a large modern campus about 4km to the south of the centre of Dublin. The School of Geography, Planning and Environmental Policy offers a vibrant research and teaching environment led by its Head, Professor Alun Jones.

Research in the School is organised around three major research themes:

- Economy, Environmental Change and Sustainability
- Governance, Public Policy and Planning
- Society, Time and Place

Candidates must possess a PhD in Environmental Policy or related discipline (or will have successfully completed a PhD by the time of taking up post). Preference may be given to candidates with research interests in one or more of the following areas: environmental policy analysis; environmental economics; environmental governance; environment, health, well-being and quality of life; development and environmental resource management; sustainable urban and rural development; the politics of sustainable development; the environment and Europe; the role of environmental policy in mitigating and adapting to environmental change; spatial analysis or application of geo-spatial technologies to environmental policy; human-environment interactions.

It is anticipated that the successful candidate will take up post in September 2010 or as soon as possible thereafter.
