Mathematics graduates have the sort of logical, analytical and problem solving skills that are highly sought after by employers.

Mathematics graduates have the sort of logical, analytical and problem solving skills that are highly sought after by employers. Typical sectors include financial services, IT, coding and cryptography, 'operations research' and teaching.

Mathematics graduates have the sort of logical, analytical and problem solving skills that are highly sought after by employers. Typical sectors include financial services, IT, coding and cryptography, 'operations research' and teaching.

A UCD Mathematics graduate writes...

'After graduation I worked in technology in a bank and then I switched to working as a financial analyst. Having a maths degree made changing careers a lot easier. Employers regard maths as a good foundation for both technology and finance.'

A good proportion of Maths Science or Maths graduates pursue postgraduate studies.

-

A good proportion of Maths Science or Maths graduates pursue postgraduate studies.

1-year Master's Degrees

- MSc Degree in Mathematical Science
- MSc Degree in Mathematics

A good proportion of Maths Science or Maths graduates pursue postgraduate studies.

1-year Master's Degrees

- MSc Degree in Mathematical Science
- MSc Degree in Mathematics

60 credits of taught modules in Semesters 1 and 2, and a 30-credit summer dissertation.

.

A good proportion of Maths Science or Maths graduates pursue postgraduate studies.

1-year Master's Degrees

- MSc Degree in Mathematical Science
- In MSc Degree in Mathematics

60 credits of taught modules in Semesters 1 and 2, and a 30-credit summer dissertation.

1-year Higher Diplomas (HDip)

- Higher Diploma in Mathematical Science
- In Higher Diploma in Mathematical Studies
