Purpose & Overarching Content
This module is designed for students who wish to understand and become critically aware of the principles, practice and applications of rapidly developing imaging technologies. Particular focus is given to transmission and fluorescent light-based imaging approaches. A series of lectures will inform about the concepts of imaging and microscopy; importance of resolution and its limits; optical components; application of histology, immunohistochemistry and immunofluorescence; basics of confocal microscopy, light sheet microscopy, super resolution microscopy, multi-photon microscopy, high content screening microscopy; techniques in light microscopy and live cell imaging; and also the relationship between light microscopy and electron microscopy. Complementary workshop sessions will provide context to lectures, allowing students to appreciate the practicalities of specific imaging modalities.

Learning Outcomes
On completion of this module students will have extensive insight into the diversity of light microscopes available and associated techniques that can be applied in the study biological samples.

No Approaches to Teaching and Learning recorded for this module for 2022/2023

Student Effort Hours

Student Effort Type	Hours
Contact Time	
Laboratories	12
Lectures	15
Total Contact Time	27
Autonomous Student Learning	
Autonomous Student Learning	98
Total Autonomous Student Learning	98
Total	125

FTE Breakdown

School	FTE
S006 - School of Biology and Environmental Science	50
S123 - Fees, State & Research Activity	50

Assessment Details

Assesment Type	Description	Timing	Open Book?	% of Final Grade	Component Scale	Must-Pass?	In-module Component Repeat Offered?
Examination	Mid-semester 1 hour exam	Unspecified		50	Graded		
Assignment	Presentation	Unspecified		50	Graded		
Total				100			

Module Descriptor for CNWY40120 in 2022/2023

Carry Forward of Passed Components
No

No Feedback Strategy recorded for this module for 2022/2023

No Remediation Strategy recorded for this module for 2022/2023

Prior Learning

Requirement	Details
Learning Recommendations	It is recommended that students have completed CNWY40090 Introduction to 'Omic' & Advanced Imaging Technologies prior to registering for this module.

Incompatible Modules

Module ID	Module Title
BIOL40560	Biological Imaging

Associated Staff

Name	Role
Ms Elaine Quinn	Assistant Grader
Professor Jeremy Simpson	Assistant Grader
Ms Iza Arrieta	Module Assistant
Mr Mark Crowley	Module Assistant
Mrs Helen Dawkins	VLE Access Only
Dr Jeffrey Glennon	VLE Access Only

Associated Majors

Programme	Major	Stage	Module Type
