PUBLICATIONS OF ANNE BUTTIMER

What follows is a quite complete list of published works by Anne Buttimer (1938-2017), done on the bases of a file that she had redacted. At each title a link has been added, leading to a full-text version when available in public research repositories, or to a publisher’s webpage when a public full-text was not available. This complies with Professor Buttimer’s wishes to have her works publicly consultable online, in the context of efforts going on at the School of Geography to store and render accessible her archives and personal library.
