

Graduate Certificate Interventional Imaging & Practice

This graduate course is designed for radiographers working within Interventional Radiology (IR) who wish to develop both their theoretical and clinical knowledge in this specialised area. This course is unique in Ireland at graduate level.

COURSE FEATURES

Addresses both theoretical and clinical practice in IR

Addresses new and evolving technological developments in the field of IR

Develops clinical and critical thinking skills

Accommodates working professionals as the material is predominantly delivered through an e-learning environment

WHO SHOULD TAKE THIS COURSE?

This course is designed for radiographers currently working in IR and who wish to develop their knowledge and expertise in this field. Applicants should have at least one year post-qualification experience and be working in the IR department over the duration of the course.

COURSE DETAILS

Major code X662

Duration 2 Semesters

Schedule Part-Time

Next intake September annually

KEY FACT

This is the first graduate taught programme in Interventional Radiology for radiographers in either Ireland or the UK.

COURSE DESCRIPTION

BUILDING EXPERTISE

The rapid expansion of IR and the widespread adoption of novel IR techniques into standard medical practice demand a highly skilled and knowledgeable interventional team.

Radiographers, working in IR, require a specific field of clinical knowledge and technical skills. This course builds on undergraduate level study to enable radiographers to become safe, effective and confident members of the IR team.

During this course students are provided with a solid foundation in; the physical principles of current IR technologies; a range of IR procedures and radiation safety.

MODULES

This programme is divided into four modules:

Patient Care & Interventional Procedures (10 Credits)

Technology of IR (5 Credits)

Cross Sectional Anatomy (5 Credits)

Radiation Safety (10 Credits)

ABOUT UCD DIAGNOSTIC IMAGING

UCD is an internationally recognised centre of excellence for Diagnostic Imaging. The School of Medicine offers an extensive portfolio of graduate taught courses, which cater to a diverse range of healthcare professionals.
