

Chemistry of Nanomaterials Group

CNEA, Buenos Aires, Argentina

Research lines

- Chemical Synthesis of Nanomaterials
 - Mesoporous oxides thin films
 - Mesoporous oxides nano & microparticles
 - Metallic Nanoparticles
 - Composites containing these materials
- Specific Functionalization
- Advanced Characterization
- Applications in adsorption, sensing, catalysis and devices for energy generation.

Who are we?

7 permanent researchers, 1 posdoc
6 PhD students, 2 Master Students

In this project:

Paula C. Angelomé angelome@cnea.gov.ar

M. Verónica Rivas verorivas383@gmail.com
