

Helium 3 Technologies & Consulting

Experts in vacuum technologies, cryogenics, gas analysis, offering advanced solutions for the academic and industrial markets.

Vacuum

- Vacuum pumps.
- Gauges, valves, fittings.
- Specialized services in leak detection and maintenance.

Gas Analysis

- Gas analysis (RGA, GAM-Series).
- Industrial and laboratory solutions.
- Technical design and advance consulting.

Cryosciences

- Cryostats and Temperature sensors.
- Advance cooling systems.
- Characterization of new materials.

Specialized consulting and technical service: more than 30 years of experience supporting scientific and industrial projects.

Cryo-permeation studies.
H₂ quality assurance system.

Clean and efficient refrigeration in vaccine transport
through the rotating magnetocaloric effect.
