

UCD REGISTRY

Registration to Labs, Tutorials and Practicals for Autumn Trimester is now complete

Dear Student,

Please note that the process to register you to your labs, practicals and tutorials for the Autumn Trimester is now complete.

What you need to do

Check your timetable to see when and where your practicals/labs/tutorials will take place.

CHEM 20090 Chemistry for Biology will appear in timetables as soon as possible. Students in that module will be contacted later in the week once that process is complete.

Please note

In some cases we may not have been able to register you to a practical/lab/tutorial time due to issues with your timetable. In this case, you will need to do the following:

- Check the Labs/Tutorials page(s) to see if you have any labs, practicals and tutorials that you need to select a time for yourself.
- If the Core/Option lab, practical or tutorial time you need to take clashes with an Elective that you are already registered to, you will need to change your Elective registration. Your Core/Option labs, practicals and tutorials take priority over Elective modules.

If you have any queries, please contact your [College or School Office](#).

Kind regards,

Ruth Harrison
