

You have been in touch to let us know that your selected pharmacy is unable to take your blood pressure (BP) or BMI, potentially due to restrictions from Covid-19.

It is essential for us to have this information before issuing a 6 month prescription; without this current information, it is not permitted for us to prescribe your medication.

It is your responsibility to provide us with this information.

In order to accommodate this we recommend:

- **Try an alternative pharmacy in your area.** We are happy to send your 6 month prescription to any pharmacy of your choosing, even if they are different from your regular pharmacy.
- **Come to the UCD Procare pharmacy.** We have confirmed that they are happy to provide this service. They will also be able to supply your prescription at that time.
- **Make a free appointment with the nurse.** The nurse will take your BP & BMI in UCD and we can send the prescription to a pharmacy of your choosing. You will not be able to discuss any medical issues or concerns with the nurse at this time.
- **Contact your own local GP.** Your local or family GP may be able to issue you a prescription directly after taking your BP & BMI. There may be additional costs. If you do not have an alternative GP you can find one in your area on [Find a GP](#) through the HSE.

Photographs or recording from personal machines will not be accepted in any circumstances.
