Degrees Explained

Taught Degrees

The majority of Graduate Taught Programmes such as Graduate Certificates, Graduate Diplomas or taught MA or MSc programmes will consist of taught modules often with the addition of a large thesis or dissertation for Master Level programmes.

Taught graduate programmes have associated levels assigned to them in accordance with the NFQ (National Framework of Qualifications). For further information please see www.nfq.ie.

Higher Diploma

Level 8 (60 Credits)

The Higher Diploma is normally awarded following completion of a programme of 1 year duration. Progress and transfer routes include transferring to programmes leading to Masters Degree/Postgraduate Diploma. These are often referred to as conversion programmes as they allow the student to gain knowledge in an area not covered by their undergraduate degree.

Professional Diploma

Level 7 8 9 (20 -30 Credits)

The Professional Diploma can be a Level 7, 8 or 9 Special Award. Programme Award credits can vary, please check programmes specific information.

Graduate Diploma

Level 9 (60-80 Credits)

The Graduate Diploma is normally awarded following completion of a programme of 1 year duration. Progression and transfer routes include exemptions from a programme leading to a Masters Degree or in certain instances it can be offered as a completely separate programme.

Masters

Level 9 (90-120 Credits)

The taught Masters Degree is awarded following completion of a programme of 1 to 2 years duration. Some of the progression and transfer routes include progression to Doctoral degrees.

Research Degrees

A research degree such as Masters by Research or PhD involves the sustained and in-depth study of a specific topic, which is then written up as a thesis for examination.

Research degrees, involve students carrying out their own research and academic study under the supervision of a principal academic supervisor with the support of a Masters or Doctoral Studies Panel. The precise focus of research is agreed between the supervisor and the student. Research can be carried out at Masters or Doctoral level.

Research Masters Degree

Level 9

Research Masters degrees provide education and training in a particular subject through original exploration and research. A Research Masters usually takes 1-2 years full-time or 2-4 years part-time to complete. The research culminates in a thesis which sets out the conclusions of the research undertaken. The assessment and award of the degree is on the basis of the thesis.

University College Dublin offers Ireland's widest range of graduate programmes which are recognised and valued by academic institutions and employers.

UCD Structured PhD

Level 10

The UCD Structured PhD aims to enable UCD PhD students achieve the best possible experience of graduate research and training. Making a substantial and original contribution to knowledge, normally leading to peer-reviewed publications remains the core objective of doctoral studies. The Structured PhD includes several innovative measures designed to support the student in achieving their academic and professional objectives. A PhD takes 3-4 years full-time or 5-6 years part-time to complete. Assessment for the award of a PhD is on the basis of a thesis which is assessed at a viva-voce exam.
