FORMATIVE ASSESSMENT: PRACTICAL IDEAS FOR IMPROVING THE EFFICIENCY AND EFFECTIVENESS OF FEEDBACK TO STUDENTS.

Giving student feedback on their learning, often described as formative assessment, has been shown to have powerful positive benefits for student learning and achievement (Nichol & McFarlane-Dick, 2009; Juwah et al, 2004; Black & William, 1998). However, this can often be a time-consuming task in an environment with stretch resources. In addition, many staff report lack of student engagement with this feedback, for example, they may not read it (Hounsell, 1987) and students also report lack of helpful feedback (Sadler, 1989; Chanock, 2000). This can result in wasted staff efforts and ineffective feedback for students.

One of the key themes emerging to address this dilemma is to develop students own self-monitoring skills in order to help them narrow the gap between their performance and the standards expected of them (Nichol, 2009; Clarke, 2001). The timing, type and specification of feedback can also improve student ability to self-monitor. In addition, good feedback should feed into some specific actions that can be used in the next assessment (Nichol & McFarlane-Dick, 2009). Feedback need not always be from the academic staff, students themselves are a good resource to each other when given guidance on how to do this. New technologies also open up some efficient feedback opportunities.

In the recent literature, there has been much attention to the development of efficient and effective feedback and this short resource leaflet highlights a few practical ideas to support students and staff in this process. This resource is also linked with more templates and practical advice on the UCD Teaching and Learning website.

Seven Principles of Giving Good Feedback (Formative Assessment):

- Facilitates the development of self-assessment (reflection) in learning.
- Encourages teacher and peer dialogue around learning.
- Helps clarify what good performance is (goals, criteria, standards expected).
- Provides opportunities to close the gap between current and desired performance.
- Delivers high quality information to students about their learning.
- Encourages positive motivational beliefs and self-esteem.
- Provides information to teachers that can be used to help shape the teaching

(Nicol & MacFarlane-Dick, 2009; Juwah et al, 2004)

SOME IDEAS: VALUE OF THIS IDEA TO **RESOURCES:** STUDENT AND OR STAFF: REFERENCE TEMPLATES, OR CASE STUDY. assessment criteria transparent to student. Where possible, involve them in developing the criteria.

- standard and helps them narrow the gap between their and the desired performance.
- In class peer and self-assess feedback activities: During class, use previous anonymous assignments or current students first drafts to peer/self assess using rubrics/assessment criteria.
- Build students ability to self-regulate their own learning and in giving feedback they become more aware of the desired standard in relation to their own work. Builds in feedback into class-time and is efficient use of staff time.
- Rust et al (2005)

- formative in early years: Consider replacing some 1st year continuous (summative/graded) assessments, by formative assessment (and/or give students choice of considering marks from formative for use as summative)
- Timely, early feedback to students.
- Gives students more support in early University years, may increase retention.
- Knight (2000)

- Comment in actionable language:
 Give feedback that includes
 actions for students to improve
 next performance (focus on
 action). Actionable comments
 (without grades) have been
 shown have been shown to be
 less demoralising for students.
- Gives students more useful advice about how to change their performance.
